

Topic: Artificial Intelligence – A Regulatory Affairs Perspective

Betsy is part of the Global R&D IT organization in Mississauga and focuses on applying AI to real-world regulatory challenges at AstraZeneca.

Betsy brings deep experience in leveraging artificial intelligence to analyze FDA approval letters—extracting key trends, identifying regulatory shifts, and generating actionable insights to support strategic decision-making.

Her work bridges clinical systems, AI, and regulatory, helping teams enhance insights, streamline processes, and stay ahead in an increasingly data-driven landscape.
