

Colin Foster

Health Canada

Director, Bureau of
Licensing Services,
Medical Devices
Directorate

Colin Foster's academic background is in the area of cellular and molecular medicine with a specific focus on cancer-based retinoid therapies (M.Sc). Colin has been a medical device regulator with Health Canada for 16 years.

Colin and his team are responsible for assisting stakeholders in understanding their regulatory obligations by helping them navigate through Health Canada's medical device legislation, regulations and guidelines.

Colin also contributes to the development of policies, guidance documents and tools that help establish a more transparent and efficient regulatory system in Canada.
