

Fred is the Manager of the Quality Systems Section in the Bureau of Planning and Operations of the Medical Devices Directorate (MDD). He has a long history of international collaboration and harmonization dating back to his membership in the Global Harmonization Task Force (GHTF) Study Group 4 starting in 2006, his participation in the development of ISO 13485:2016, and his pivotal contribution to the development of the Medical Device Single Audit Program (MDSAP).

Fred is the current Chair of the Canadian Mirror Committee to ISO Technical Committee 210 and CSA's Z289 technical committee on Quality Management and General Aspects for Medical Devices.

He is currently a subject matter expert, assessment team leader, and assessment program manager representing Canada in the MDSAP Consortium. Before joining MDD in 2002, Frédéric worked in sensing material research at the National Research Council and in process integration and optimization in industry. He holds a degree in Chemical Engineering.
